PROFILE

Software Engineer and .NET Developer with 6 years of experience building backend, mobile, and distributed systems across fintech and enterprise platforms. Delivers measurable improvements in performance, reliability, security, and release velocity using C#, .NET, Azure, SQL, Docker, and CI/CD. Experienced in technical leadership, cross-functional delivery, and mentoring.

CORE TECHNOLOGIES

Backend: C#, .NET, ASP.NET Core, REST APIs, microservices, distributed systems, API design
Cloud & delivery: Azure, Azure Functions, Azure Service Bus, Azure DevOps, Docker, CI/CD, observability
Data & security: SQL Server, PostgreSQL, Redis, secure coding, incident response
Mobile & web: Flutter, Angular

EXPERIENCE

Software Developer
May 2025 - Present
Bauer Media Outdoor | United Kingdom

- Developed data ingestion engine features that increased processing speed by 13,000%; led SSD monitoring that provided full estate visibility and 100% support coverage.
- Built an internal scanner that reduced manual workload by 90%; redesigned an encryption tool as a CLI, reducing manual effort by 100% and improving deployment reliability by 95%.
- Containerized C# services and Angular applications, improving portability, traceability, environment isolation, and reliability.

Lead Mobile Engineer (concurrent role)
June 2021 - May 2025
Cardinalstone | Nigeria

- Led development of the flagship Flutter investment app, reaching 10,000 downloads and a 3.8 app-store rating; customer retention and satisfaction improved to 8/10 versus the previous version.
- Implemented WebSocket-based market movement streaming, delivering up to 95% real-time visibility for users.
- Created shared libraries adopted by other teams, reducing duplicated engineering effort by nearly 60%; mentored two junior developers.

Lead Backend Engineer (concurrent role)
April 2022 - May 2025
Vigipay | Nigeria and United States

- Led architecture and delivery of the first B2B remittance product, onboarding 500 SMEs in 30 days and processing over $40,000 in transactions.
- Built asynchronous payment workflows that increased processing speed by 90% and throughput by over 110%.
- Reduced build times from five minutes to under one minute and engineering redundancy by 80%; AML and fraud checks reduced risky transactions by 50% before manual review.

EXPERIENCE (CONTINUED)

Backend Engineer (concurrent role)
March 2022 - December 2023
Sterling Bank | Nigeria

- Led a card management platform revamp serving over two million customers, onboarding 200,000 in the first 60 days after launch.
- Led delivery of funds collection, transaction management, and settlement platform for 30+ renewable energy entities; developed APIs across card and digital banking products.

Backend Engineer (concurrent role)
October 2020 - January 2022
First Bank of Nigeria

- Built payment modules for an internet banking modernization program serving over three million digital users and one million SMEs.
- Delivered a bill payment module that processed over $110,000 in its first 90 days.
- Built CI/CD pipelines reducing manual deployment effort by 90% and backend services supporting over four million active users.

Software Developer
October 2019 - June 2021
Digital Marketing Limited | Nigeria

- Delivered payroll platform features for a lending-focused banking arm serving over 500,000 users and 30,000 SMEs.
- Integrated third-party payments supporting over 200,000 users and more than $140,000 in transactions in the first 60 days.
- Developed Angular interfaces that improved customer interaction, adoption, and retention by up to 70%; reduced minimum incident resolution time by 50% through second-line support.

EDUCATION & RECOGNITION

MSc Cybersecurity | University of Salford
Crest Africa Tech Impact Leader of the Year | 2025
Technical speaker | 12+ technology events in the UK and internationally
Published writing and research | Zenodo, Biz Weekly, Techpression, Independent, Vanguard, Daily Times, and Tech Economy
